

LINEARSTAR[®]

Outdoor LED Sign Lighting
and Wall Washer

Built To Help You
Stand Out After Dark

USLED[®]
Always the Right Choice!

**WE DO THE RIGHT THINGS,
THE RIGHT WAY, AND ON TIME.™**

Since 2001, sign lighting has been part of how US LED helps brands come alive after dark. A well-lit sign creates recognition, instills confidence, and leaves a lasting first impression on customers.

LinearStar continues that legacy forward. Built on US LED's long history in sign lighting, it helps businesses stand out when visibility matters most and gives sign professionals a proven way to illuminate the signs that make brands unforgettable.

Lighting Up The Moment Your Brand Gets Noticed

US LED's LinearStar outdoor LED sign lighting system is designed to help you shine when it matters most—after dark. Whether you need to illuminate exterior signage or spotlight architectural details, it delivers precise illumination that makes your brand stand out naturally and attractively. With LinearStar, your business will create a distinctive first impression effortlessly and confidently.

Now supporting uplight and downlight applications, LinearStar gives installers greater flexibility to achieve consistent lighting in a wide range of outdoor conditions. The improved sealed lens assembly, proprietary refractive optics, and strong construction ensure dependable operation in any environment. Choose from modular 1 ft. and 4 ft. sections to create seamless, continuous runs that light your target surface perfectly.

A powerful combination of versatility and scalability that elevates what exterior sign lighting can do.

By popular demand, LinearStar delivers the **uplight and downlight flexibility** professionals need to solve more sign lighting challenges.

Delivers Flawless Visibility For Your Signs and Walls

Proprietary refractive optics bathe surfaces in smooth, even illumination, eliminating dark spots, shadows, and unsightly hot spots. Every detail stands out, making sure signage is always seen in the best possible light.

Engineered To Endure

An advanced sealed lens assembly and rugged die-cast aluminum housing protect LinearStar from the harshest weather (IP65 rating), all while retaining a pristine, professional appearance year after year.

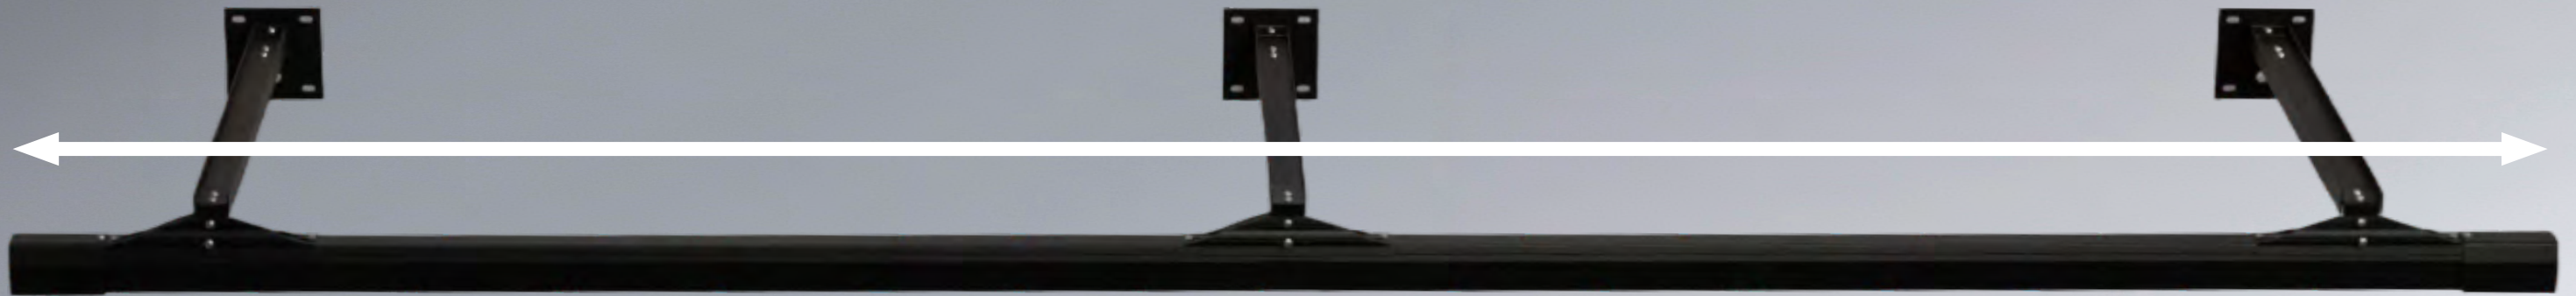

Conquers The Toughest Installation Difficulties

The LinearStar system empowers installers with uplight and downlight versatility, enabling new possibilities where typical mounting fails. No matter the site, sign, or how tight the space, you still have total control and get flawless results.

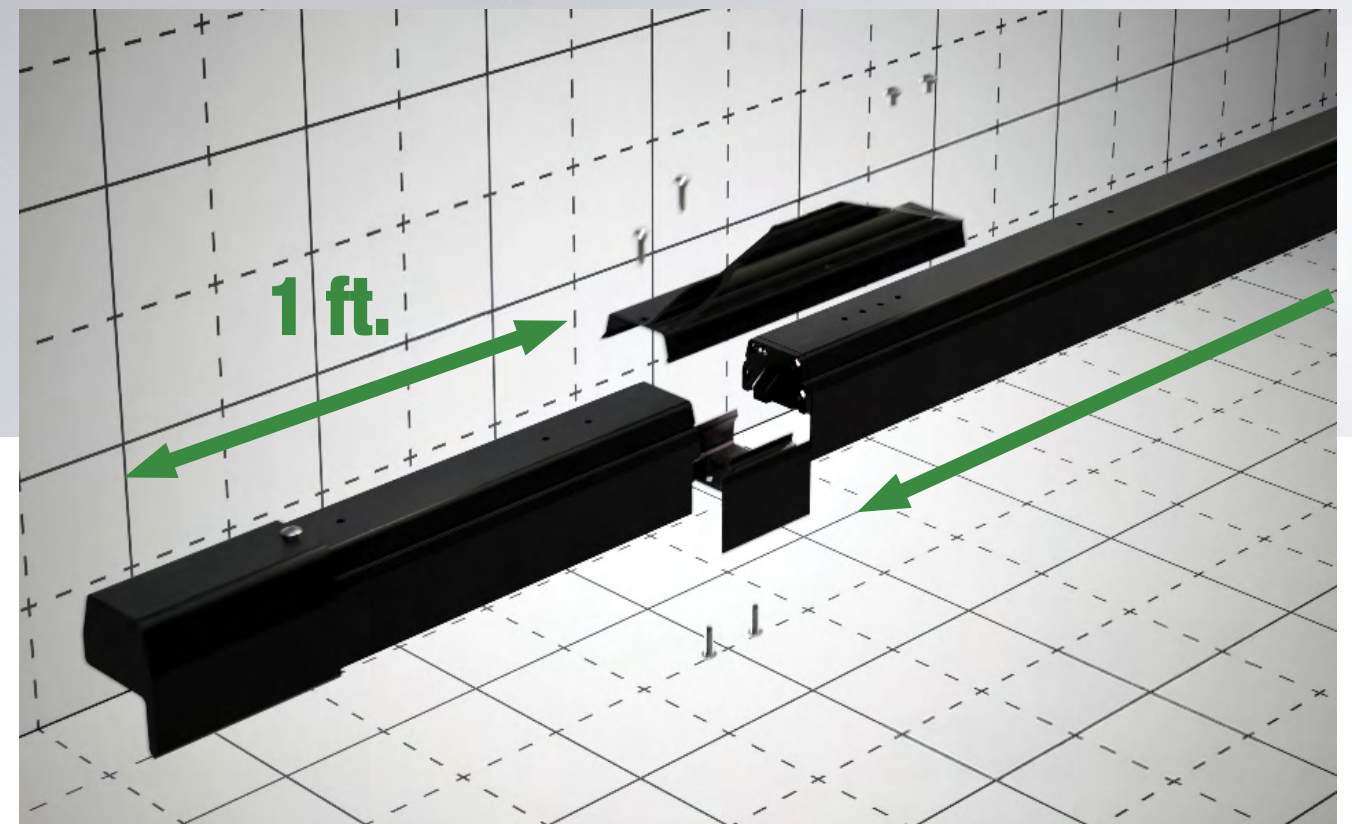

CONNECT UNITS FOR DESIRED LENGTH

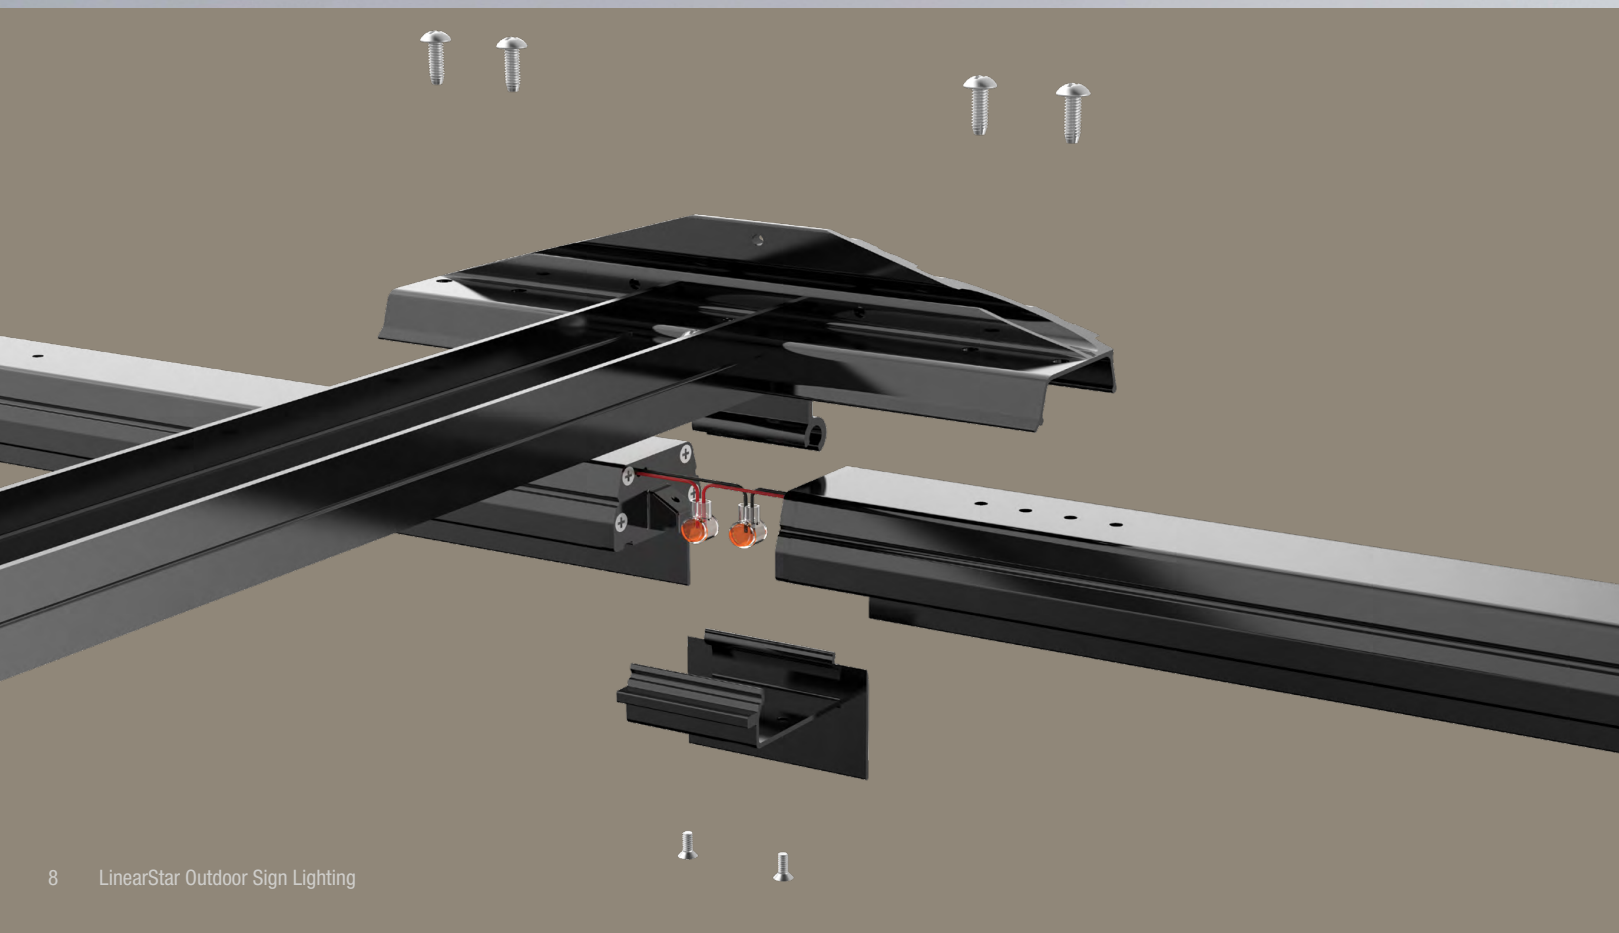

Adapts Naturally To Your Needs

Feeling limited with exterior sign lighting? LinearStar changes all of that with modular 1 ft. and 4 ft. sections that scale beyond the standalone 4 ft. unit. Now you can create a unique solution for any sign length or architectural feature—no compromises, just the right fit every time.

Simplifies Service and Maintenance

Each LinearStar section is designed for easy servicing and replacement, allowing individual sections to be swapped without disturbing adjacent units. Reduced downtime. Minimal effort.

For over 25 years, US LED has helped shape how brands are seen after dark. With LinearStar, that commitment continues, giving sign professionals more freedom to create the kind of visibility that leaves a lasting impression.

Key Product Features

- High-performance LEDs with 5000K CCT; 1,554 lumens per 4-ft section.
- Supports uplight and downlight installations for greater flexibility in challenging applications.
- An improved sealed lens assembly protects against outdoor conditions and offers long-lasting sign-lighting performance.
- Proprietary refractive optics evenly distribute light across signage, walls, and architectural surfaces while remaining close to the surface.
- Modular 1-ft. and 4-ft. sections can be combined for longer continuous runs and serviced individually without disturbing adjacent units.
- The LinearStar sign lighting system is backed by US LED's limited Five-Year Warranty.
